SUMMARY

MERN Stack Developer with experience building and deploying a Personal Finance Dashboard featuring third-party bank integration using Plaid, JWT-based authentication, and MongoDB data modeling. Proficient in React.js, Node.js, Express.js, and MongoDB, with strong analytical and problem-solving skills and experience working effectively in team-based development environments.

SKILLS

Frontend : HTML5, CSS3, JavaScript (ES6+), React.js, React Router, React Hooks, Axios, Context API, Responsive Web Design

Backend : Node.js, Express.js, REST APIs, API Integration, JSON, JWT Authentication

Database : MongoDB, Mongoose

Tools : Git, GitHub, Thunder Client

EXPERIENCE

MERN Stack Intern | Infyntrek Systems | AUG 2026 – Present

- Developed a Personal Finance Management Dashboard using React.js, Node.js, Express.js, and MongoDB, integrating 17 REST APIs for authentication, accounts, and transactions.
- Implemented JWT authentication and bcrypt password hashing, and designed 4 MongoDB schemas using Mongoose to model users, accounts, transactions, and budgets.
- Integrated Plaid Link for bank account connectivity and used Recharts to build interactive financial dashboards and spending visualizations.
- Tested and debugged backend APIs using Thunder Client and integrated frontend features through Git and GitHub-based development workflows.

PROJECTS

Portfolio | HTML5 . CSS3 . React.js

- Developed a fully responsive personal portfolio website using React.js, ensuring a consistent user experience across desktop, tablet, and mobile devices. Implemented scroll-based animations using AOS (Animate On Scroll) to improve visual engagement.
- Github | [Live link](#)

E-Commerce Web Application | React.js · Node.js · Express.js · MongoDB

- Built TrendKart, a React-based e-commerce platform using Context API for global cart and authentication state management. Developed and integrated 9 REST API endpoints using Express.js for product management, user authentication, and cart operations, with JWT authentication and bcrypt password hashing. Implemented client-side routing with React Router, including a custom 404 page for invalid URLs.
